Join the Root River Soil & Water Conservation District for this FREE soil health workshop!

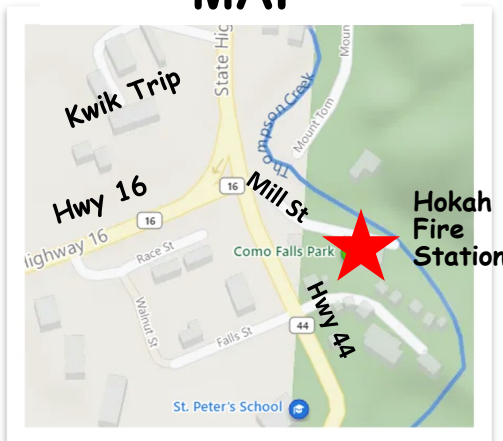

This event is part of the I-90 Soil Health Tour with stops in
Hokah (Tues, 2/8) Fairmont (Thurs, 2/10)
Albert Lea (Wed, 2/9) Heron Lake (Fri, 2/11)

Learn how soil health practices such as reducing tillage, using cover crops, and implementing diversity in the system helps cut soil fertility needs.

- Reduce fertilizer and herbicide inputs
- Improve nutrient use efficiency
- Optimize fertility recommendations
- Implement reduced rates of fertilizer through reduction in tillage

MAP

GUEST SPEAKERS

Mitchell Hora – Seventh generation Iowa farmer and podcast host of *Field Work* with experience in reducing fertilizer inputs by 45%.

Myron Sylling – Local soil health innovator from Spring Grove, MN. He has 26 years of experience with practices such as no-till and cover crops.
